

1. *How many hours did it take you to complete this assessment?*

According to my tracker it took me about 30 hours, but I get very distracted all the time so that number might not be accurate.

2. *What online resources you have used? (My lectures, YouTube, Stack overflow etc.)*

I only used your lectures and occasionally <https://www.w3schools.com/> when I'd forget certain Java syntax or build-in methods. I also referenced medium.com in my Money.java class, whose code I adapted to make my equals() and compareTo() methods. The full link is cited at the top of that code.

3. *Did you need to ask any of your friends in solving the problems.*

No I didn't.

4. *Did you need to ask questions to any of your instructors?*

No I didn't.

5. *Rate (subjectively) the difficulty of each question from your own perspective, and whether you feel confident that you can solve a similar but different problem requiring some of the same techniques in the future now that you've completed this one.*

I found this to be maybe a 7 out of 10 difficulty. Wrapping my head around classes hurt my brain a bit but they were also familiar enough from previous courses that it wasn't too bad
